THE BRIEF

# A direct relationship.
# A brand worth remembering.

THE BRAND IDEA

## Your farm. Your decision.
## Oceania by your side.

Proposed positioning - wording to validate with farmers

### WHAT WE NEED TO ACHIEVE

- Build a national brand through a direct-to-farmer relationship.
- Make farmers feel respected, confident and proud to participate.
- Turn attention into useful conversations, orders and field visits.

### CONFIRMED OFFER

**DIRECT ORDERING** | **CROP ADVICE** | **FIELD VISITS / DEMOS**

- English website at launch; national brand positioning.
- Maharashtra is the initial operating context, not the headline.
- Partner mockups express intent; layout and claims need review.

AUDIENCE & NEEDS

# Design for a person holding a phone.

**~99%**

**Phone audience**

Founder estimate;
not measured analytics.

### KNOWN FROM THE BRIEF

- Farmers choosing crop inputs.
- Direct advice, ordering and field access.
- English launch; Marathi advice available.

| NEED TO SERVE | | DESIGN RESPONSE |
|---|---|---|
| **Understand relevance** | → | Clear category + one short promise |
| **Judge credibility** | → | Real people + documented field stories |
| **Keep control** | → | Choices, product facts, no forced signup |
| **Reach someone** | → | WhatsApp / call + callback alternative |

- Validate age mix, gender mix, crops, farm sizes and English comfort.
- Include women and different generations; avoid a single invented persona.

RESEARCH TO DECISIONS

# Evidence informs the design. It does not guarantee results.

LOCAL FARMER VIDEO: BIHAR EVALUATION [1]

## 400 villages

280 video villages / 120 comparison villages

- 12-18% higher yields after one year versus conventional extension.
- Use genuine peer demonstrations with context, not generic praise.

- Context: women farmers, rice practices and facilitated group extension.
- Effects weakened after two years; this is not a website conversion forecast.

### RECOGNITION [2]

- Distinctive assets require brand association and uniqueness.
- Repeat colour, typography and a recognisable device across touchpoints.

### CATEGORY OBSERVATION [3, 4]

- DeHaat and BharatAgri connect crop support with product access.
- Make advice, products and field visits obvious choices.
- Competitor websites describe offers; they do not prove our outcomes.

VISUAL DIRECTION UNDER CONSIDERATION

# Pine & clay.
# Familiar roots. A clearer identity.

## COLOUR ROLES

**Pine - brand**
#24483C

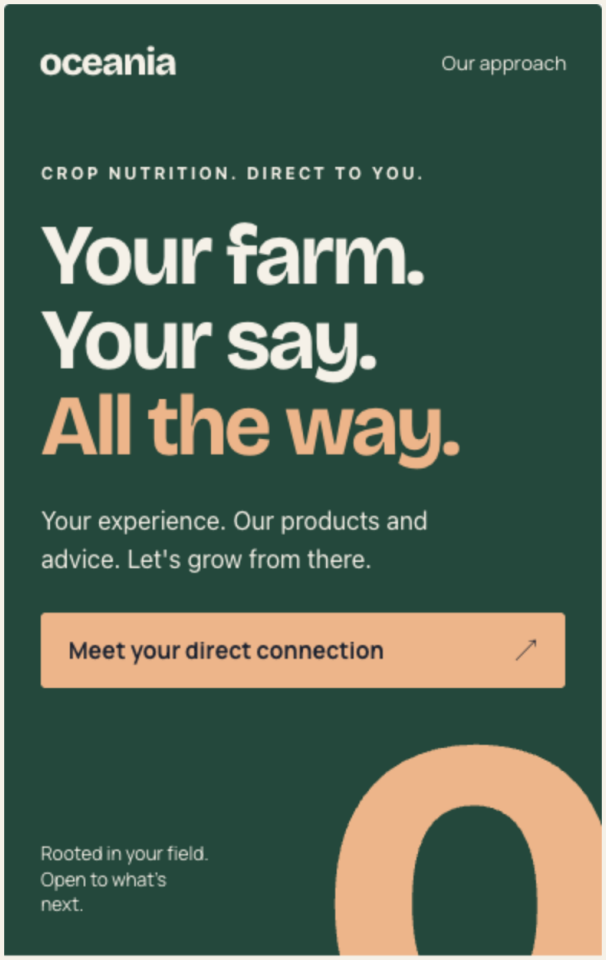

**Clay - actions**
#EDB58A

**Paper - reading**
#F5F1E8

**Ink - text**
#1D2330

## TYPE & CHARACTER [5, 6]

- Bricolage Grotesque: expressive headlines.
- Manrope: clear copy and controls.
- Deep green + warm clay; fewer decorative motifs.

Illustrative mobile study; copy and logo are provisional.

- Distinctiveness comes from the whole system, not green alone.
- Use real portraits and natural crop colours; retain agricultural familiarity.
- Repeat the O-derived frame on the website, field signs and video covers.
- Pine and clay is being considered; the visual selection is not final approval.

MOBILE EXPERIENCE

# Five moments.
# One easy next step.

1

ARRIVE

## Bold promise + visible contact

- Understand Oceania immediately

2

MEET

## Real farmer or accountable team

- Find a credible human connection

3

CHOOSE

## Advice / products / demo visit

- Follow a relevant path

4

INSPECT

## One product or field record

- See facts before deciding

5

CONNECT

## WhatsApp / call / callback

- Start a useful conversation

- Vary the rhythm: bold type, portrait, choice, evidence, contact.
- Keep products and contact reachable without completing the story.
- Use tap-to-play video; familiar scrolling; restrained, optional motion.

DELIVERY & SUCCESS

# Build trust into the experience.

| LESS OF THIS | | MORE OF THIS |
|---|---|---|
| Long brand explanations | → | **Short claims + useful proof** |
| Ideal-farmer metaphors | → | **Farmer experience and agency** |
| Dealer recruitment upfront | → | **Direct farmer relationship** |
| Dense pack / testimonial grids | → | **Focused choices + detail on demand** |

## COMMUNITY THAT EARNS PARTICIPATION

- Start with field visits, useful questions and shared observations.
- Recognise contributions with permission; make updates opt-in.

## VALIDATE BEFORE EXPANDING

- Test with 6-8 target farmers: comprehension, next action and later recall.
- Check ordinary phones, slow connections, text size and contact flows.
- Measure qualified conversations, completed callbacks, visits and orders.
- Reuse existing product, consent and lead infrastructure.

Targets and service response times: set after the initial baseline.

DECISION & REFERENCES

# What we align on next.

- Confirm Pine and clay, or select another grounded green direction.
- Supply final product facts, pack shots, team details and contact channels.
- Collect genuine portraits and one documented field story with permission.
- Review English comprehension; refine prototype before implementation.
